| General Details | |
|---|---|
| **Company** | ARVENSIS ENERGY PRIVATE LIMITED |
| **CIN** | U45207AP2013PTC090083 |
| **PAN** | AAMCA0318A |
| **Incorporation** | 2013 |
| **Registered office** | 32-35-54, Sriven Residency, GF-2, Jamindar Street, Machavaram, Vijayawada – 520004, Andhra Pradesh, India |
| **Branch Office** | Kolluri House, 1st Floor, #8-3-318/11/3, Plot No. 3, Jai Prakash Nagar, Yellareddyguda, Ameerpet, Hyderabad – 500073, Telangana, India |
| **Website** | http://www.arvensis.in/ |
| **Industry** | Power Transmission, Distribution, Telecom infra & Solar projects from concept to commissioning. |
| **Company Profile** | **Arvensis Energy Private Limited**, established in 2013, is an ISO 9001:2015 certified integrated EPC solutions provider with expertise across Power Transmission & Distribution (T&D), Telecom Infrastructure, and Renewable Energy. The company delivers comprehensive solutions spanning in-house design, engineering, and manufacturing through to project execution, management, and long-term O&M services, making it a trusted partner for critical infrastructure project.<br><br>With a state-of-the-art manufacturing facility near Chennai port and operations spread across multiple Indian states as well as 14 countries in Africa and Asia, Arvensis has built a strong global presence. Its portfolio includes prestigious assignments for national utilities, corporates, and institutions, reflecting the company's ability to execute large-scale, complex projects with efficiency and reliability.<br><br>The company has demonstrated remarkable growth, with revenues increasing from INR 154.34 Cr in FY23 to INR 350.37 cr in FY24 & INR 562.56 Cr in FY25, representing an exceptional CAGR. This growth is supported by a business model anchored in project contracts and recurring long-term service agreements, providing stability and predictability in revenues. Recent expansions in solar power development and O&M services further enhance this growth trajectory.<br><br>Arvensis is well-positioned to capitalize on the global demand for sustainable infrastructure and clean energy. To support its continued aggressive expansion, optimize the capital structure, and strengthen working capital, the company is seeking to raise INR 70 Crores in funding. |
| **Global Network & Subsidiaries** | Arvensis operates a sophisticated international structure through subsidiaries and joint ventures, ensuring localized market expertise and execution capabilities:<br>• **Arvensis Jayaam India Private Limited** (Chennai, India)<br>• **BGR Engineering Services Pvt Ltd** (Hyderabad, India) |

</td></tr>
<tr><td>Business Model & Operational Capabilities</td><td>
Arvensis Energy Private Limited operates on an integrated business model that offers clients a single-point solution for complex infrastructure projects. The company covers the full project lifecycle—from development (feasibility studies, planning, and financial structuring) to EPC execution through in-house design, engineering, manufacturing, procurement, and construction management, followed by long-term O&M services. This end-to-end EPC approach ensures efficient project delivery, reduced costs, and recurring revenues through ongoing service contracts.
Arvensis’s EPC expertise spans multiple verticals including Power Transmission & Distribution (lattice towers, monopoles, substations up to 400kV, OPGW live-line stringing, and civil works), Telecom Infrastructure (ground-based, rooftop, monopoles, and rapid-deployment solutions like Cell on Wheels), Renewable Energy (solar EPC and hybrid solar-wind projects), and Pre-Engineered Buildings for industrial and commercial use. Backed by state-of-the-art manufacturing facilities near Chennai port—with a capacity of 30,000 MT for towers and 50,000 MT for galvanization—Arvensis ensures scalability, precision, and global compliance (IS, BS, ASTM, IEC), positioning itself as a trusted EPC partner for large-scale, sustainable infrastructure development worldwide.
</td></tr>
<tr><td>Key Milestones</td><td>Arvensis Energy has supplied over 30,000 MT of towers and structures in the past three years, successfully type-tested towers up to 330kV for international clients, executed 5,500 km of OPGW live-line stringing across multiple countries, and deployed hybrid power solutions along with Pre-Engineered Buildings.</td></tr>

| **Power T&D** | Electricity Company of Ghana | Design, manufacture, type testing & supply of 33kV DC towers |
| | Transmission Co. of Nigeria | Supply of 132kV & 330kV transmission towers |
| | APTRANSCO (India) | Live-line installation of 2,500 km OPGW cable |
| | Sabah Electricity (Malaysia) | Design, manufacture & testing of 132kV monopoles |
| **Telecom** | African Towers Limited (Ghana) | Supply of angular towers, monopoles & rooftop towers |
| | Myanmar Tower Company | Supply of RF hardware & fall arrestor systems |
| | MTCIL | Supply & installation of 18 repeater stations |
| **Renewables** | E.co, Myanmar | Supply & installation of 100kW hybrid (solar+wind) system |

| | |
|---|---|
| **Debtor Realizations and FY26 Turnover Outlook** | The company experienced a sharp sales decline, dropping from Rs. 560.31 crore in FY 2024-25 to just Rs. 56.16 crore in FY 2025-26 as of Mid Sept. This drop is closely tied to the concentration of unpaid receivables from Africa, which contributed Rs. 460.80 crore (82.2% of FY 2024-25 sales), leaving the business highly exposed to political disruptions and election-related payment delays that squeezed liquidity and restricted ongoing operations.<br><br>**Debtors & Payments Received**<br>As of August 31, 2025, total outstanding debtors stood at Rs. 164.28 crore, with Rs. 103.73 crore (63.1%) overdue for over 180 days, placing considerable pressure on working capital. Debtor aging comparisons from March and August 2025 indicate that certain key customers began remitting dues, showing progress in collections:<br><br>• Bondada Engineering Limited (TN): Reduced dues from Rs. 16.05 crore (March) to Rs. 11.26 crore (August), ~**Rs. 4.79 crore received.**<br>• Finch General Trading FZE: Reduced from Rs. 8.40 crore to Rs. 5.83 crore, ~**Rs. 2.57 crore collected.**<br>• Hayat Communications Co. KSCC: Reduced from Rs. 5.69 crore to Rs. 3.32 crore, ~**Rs. 2.37 crore collected.**<br>• Salvo Energy Limited: Reduced from Rs. 6.43 crore to Rs. 4.48 crore, ~**Rs. 1.95 crore collected.**<br>• Omni Poultry Farm Limited: Outstanding increased, reflecting new invoices, with overdue 180+ days rising from Rs. 5.14 crore to Rs. 5.59 crore.<br>• Luton Engineering Services (Southwest) Ltd: Rs. 2.08 crore unchanged, reflecting both turnover and continued payment difficulties.<br>• Mustek Engineering Ltd: Overall outstanding grew from Rs. 10.79 crore to Rs. 15.65 crore, with the 180+ day overdue increasing slightly from Rs. 10.16 crore to Rs. 10.79 crore.<br><br>The prevalence of overdue receivables restricted the company's ability to take new orders and recognize further sales, yet active collections and some recoveries underscore customer engagement and improving conditions.<br><br>**FY26 Turnover Justification**<br>Despite these hurdles, the company's target turnover of Rs. 575 crore for FY 2025-26 is underpinned by robust fundamentals:<br>• Strong Order Book: The confirmed order book is valued at Rs. 739 crore which remains unexecuted as of September 1, 2025. Rs. 200 crore of this is expected to be booked from Q2–Q3 FY 2025-26 & Rs. 325 crore of this is expected to be booked from Q3–Q4 FY 2025-26, primarily from African customers, where |

collections are now progressing. This also include orders from Malaysia worth 67 cr & 195 cr from India.

- Debtor Realization Plan: Payment delays in Africa, especially Ghana, were primarily election-related. With the region stabilizing post-election and governments initiating reforms, substantial clearance of outstanding dues is anticipated by December 2025. Recent partial payments reinforce this positive outlook.

The upcoming release of funds & additional working capital will enable the company to resume full-scale deliveries, execute the pending order book, and achieve its full-year sales projections.

**African Scenario & Collection Expectations**

- The Ghanaian and broader African situation was temporarily adverse due to election-related administrative slowdowns. Now, following the political transition, customers, especially in the public and infrastructure sectors, have resumed contractual payments.
- The company is working closely with these customers to ensure release of payments by December, which is a realistic target considering the current pace of discussions and the local government's public assurances. The company have already recovered about Rs. 20 cr.
- Once these receivables are realized, operational throughput and turnover will be restored rapidly.
